S-IJ INK JET HEAD POSITIONING HOLDER

Accurately positions ink jet head over product for clear and precise marking

FEATURES

- Bracket mount provides precise x y positioning of ink jet head over centerline of product.
- Bracket mount is interchangeable to fit most "industry manufactured" ink jet heads.
- Bracket design lifts vertically if contacted by product, reducing the possibility of damage to the print head.

SPECIFICATIONS

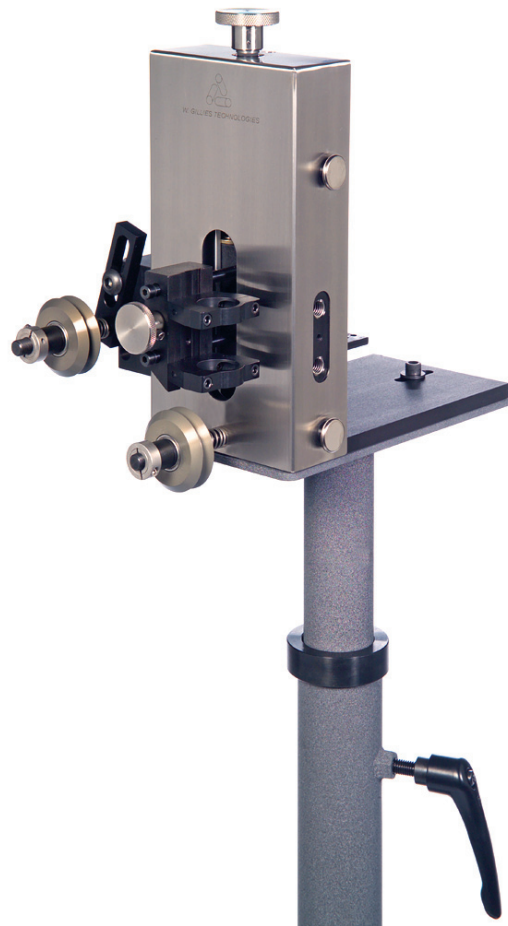

- Running direction is horizontal: specified as left to right or right to left.
- Holder dimensions less guide rolls: 7" wide x 14" high x 16" deep
- Allow 8" additional space if incoming and exiting guide rollers are used

APPLICATIONS

- Used in locations where a measuring wheel is not required. For measuring/encoder wheel applications reference our Model S-10 guidance station.
- Setup less guide wheels for complete non contact applications.
- Setup with guide rollers when product guidance is required.

OPTIONS

- Guide rod holders and guide wheels available to cover product up to 1¹/₄" round and flat material up to 1¹/₄" wide
- Height adjustable stand for product positioning 30¹/₂" to 47" from floor
